

Aruba Network Security Fundamentals

Examen-ID: HPE6-A78

Trainings-ID: ANSF

[Zum Seminar →](#)

Das nehmen Sie mit

The Aruba Network Security Fundamentals course covers foundational security concepts and prepares candidates to take the exam to achieve Aruba Certified Networking Security Associate (ACNSA) certification. The course describes common security threats and vulnerabilities and provides an overview of important security technologies. It teaches how to create a trusted network infrastructure with Aruba mobility solutions and switches. In addition to discussing device hardening, the course discusses implementing security at the edge with AAA, basic roles and firewall policies, dynamic segmentation, and endpoint classification. The course will further explain basic threat detection technologies and how to collect logs and alarms and use them to initiate an investigation.

After you successfully complete this course, expect to be able to:

- Protect and Defend
 - Define security terminology
 - Harden devices
 - Secure a WLAN
 - Secure a wired LAN
 - Secure the WAN
 - Classify endpoints
- Analyze
 - Threat detection
 - Troubleshooting
 - Endpoint classification
