

Managing Campus Networks with Aruba Central (AOS 8), Rev. 22.21

Trainings-ID: Aruba-Central

[Zum Seminar →](#)

Das nehmen Sie mit

The Managing Campus Networks with Aruba Central, Rev. 22.21 (Central) 2-day course covers the campus cloud-based management system that lets you centrally manage and monitor wired and wireless networks.

This course covers the Aruba Central management service and includes options for onboarding devices by managing Aruba Instant Access Points and Aruba switches both as a standalone customer or as an Managed Service Provider (MSP).

Participants will view the advanced analytic services and connectivity health of devices and clients, providing insights into Wi-Fi analytics for smart business decisions. Participants will learn how to simplify visitor access management with a fully secure and scalable guest access solution including guest cloud services.

This course also provides students the knowledge, skills and practical experience required to set up, configure and manage a network as a service offering. Through lecture and hands-on labs, students will discover the comprehensive management, device connectivity, network health and user account activity with Aruba Central.

Zielgruppen

for technical personnel who want a deep-dive into Aruba Central and Network Administrators who need to centralize the management and configuration of Aruba IAPs and Switches.
