

Architecting on AWS with AWS Jam

Trainings-ID: AWSA01-JAM

Zum Seminar →

Das nehmen Sie mit

Architecting on AWS with AWS Jam is for solutions architects, solution-design engineers, and developers seeking an understanding of AWS architecting. In this course, you will learn to identify services and features to build resilient, secure and highly available IT solutions on the AWS Cloud. Architectural solutions differ depending on industry, types of applications, and business size. AWS Authorized Instructors emphasize best practices using the AWS Well-Architected Framework, and guide you through the process of designing optimal IT solutions, based on real-life scenarios. The modules focus on account security, networking, compute, storage, databases, monitoring, automation, containers, serverless architecture, edge services, and backup and recovery. At the end of the course, you will practice building a solution and apply what you have learned with confidence

Course objectives

- Identify AWS architecting basic practices
- Explore using the AWS management tools: The AWS Console, Command Line Interface (CLI), and CloudFormation in a lab environment
- Examine the enforcement of accounts security using policies
- Identify the elements that build an elastic, secure, virtual network that includes private and public subnets
- Practice building an AWS core networking infrastructure
- Determine strategies for a layered security approach to Virtual Private Cloud (VPC) subnets
- Identify strategies to select the appropriate compute resources based on business use-cases
- Practice building a VPC and adding an Elastic Cloud Compute (EC2) instance in a lab environment

Sie haben Fragen? ☎ +43 1 533 1777-0 ✉ info@etc.at 📍 Modecenterstraße 22, 1030 Wien

- Practice installing an Amazon Relational Database Service (RDS) instance and an Application Load Balancer (ALB) in the VPC you created
- Compare and contrast AWS storage products and services, based on business scenarios
- Compare and contrast the different types of AWS database services based on business needs
- Practice building a highly available, auto-scaling database layer in a lab
- Explore the business value of AWS monitoring solutions
- Identify and discuss AWS automation tools that will help you build, maintain and evolve your infrastructure
- Discuss network peering, VPC endpoints, gateway and routing solutions based on use-cases
- Discuss hybrid networking configurations to extend and secure your infrastructure
- Discuss the benefits of microservices as an effective decoupling strategy to power highly available applications at scale
- Explore AWS container services for the rapid implementation of an infrastructure-agnostic, portable application environment
- Identify the business and security benefits of AWS serverless services based on business examples
- Practice building a serverless infrastructure in a lab environment
- Discuss the ways in which AWS edge services address latency and security
- Practice building a CloudFront deployment with an S3 backend in a lab environment
- Explore AWS backup, recovery solutions, and best practices to ensure resiliency and business continuity
- Build a highly available and secure cloud architecture based on a business problem, in a projectbased facilitator-guided lab

Zielgruppen

This course is intended for:

- solutions architects
- solution-design engineers
- developers seeking an understanding of AWS architecting
- and individuals seeking the AWS Solutions Architect-Associate certification.

Wichtige Informationen

Dieses Training dient zur Vorbereitung auf die Prüfung **AWS Certified Solutions Architect - Associate**, die zum Status AWS Certified Solutions Architect Associate führt.

Wir weisen darauf hin, dass für ein erfolgreiches Absolvieren des Examins etwa 1 Jahr praktische Erfahrung mit der AWS Cloud empfohlen wird.

Am 4-ten Tag findest das AWS Jam Event zum Training "Architecting on AWS" statt, die eine spielerische Veranstaltung ist, bei der die Teams um Punkte konkurrieren, indem sie eine Reihe von Herausforderungen nach bewährten Verfahren, die auf den im Training behandelten Konzepten basieren.

Sie können eine breite Palette von AWS-Services in einer Reihe von realen Szenarien erleben, die häufige Betriebs- und Fehlerbehebungsaufgaben darstellen.

Das Endergebnis ist das Entwickeln, Verbessern und Validieren Ihrer Fähigkeiten in der AWS-Cloud durch das Lösen von Problemen in der Praxis, das Erforschen neuer Services, Funktionen und Verstehen, wie sie zusammenarbeiten.

Dieses Training bieten wir auch ohne AWS Jam an -> **Architecting on AWS**
