Building Data Analytics Solutions Using Amazon Redshift

Trainings-ID: AWSS16

Zum Seminar →

Das nehmen Sie mit

The course dives deep into the Amazon Redshift service and the current thinking in building and operating data analytics pipelines to turn data into insights. You can ask questions and get real-time feedback from expert AWS instructors to immediately apply to your data analytics solutions. You'll build a data warehouse analytics workflow based on a real-world scenario with the content learned through tutorials, hands-on labs, discussion, demonstration, presentations, and group exercises.

Zielgruppen

- Data warehouse engineers
- Data platform engineers
- Architects and operators who build and manage data analytics pipelines
