

# Implementing Secure Azure Active Directory

---

Trainings-ID: CMAP24-Mod10

[Zum Seminar →](#)

---

## Das nehmen Sie mit

Students will become familiar with the most important Azure Active Directory security settings. After completing the module they will be able to implement: AAD Identity Protection, AAD PI and AAD Password Protection

## Zielgruppen

- Ambitious Beginners in Cybersecurity - if you are a beginner with 1-2 years experience in cybersecurity, challenges define who you are. This training will hone your skills to detect today's sophisticated cyberattacks and accelerate your career prospects in the field.
- Specialists in IT - if you have 4-5 years experience in IT and want to spin off into cybersecurity, this training will give you all the relevant foundation and specialist skillsets to carve an exciting new career in cybersecurity.
- Cybersecurity Specialists - this program is relevant for specialists with 3-5 years and more. You will polish up your skills, learn the most current tools and techniques relevant for the newest systems, and boost your reputation
