

Mastering Code Security

Trainings-ID: CMAP24-Mod8

[Zum Seminar →](#)

Das nehmen Sie mit

The task to create and maintain secure applications, or fixing existing applications, can be difficult. It is not different for APIs. This module has been designed to give you an overview and working understanding of how to develop secure APIs and Web applications.

Zielgruppen

- Ambitious Beginners in Cybersecurity - if you are a beginner with 1-2 years experience in cybersecurity, challenges define who you are. This training will hone your skills to detect today's sophisticated cyberattacks and accelerate your career prospects in the field.
- Specialists in IT - if you have 4-5 years experience in IT and want to spin off into cybersecurity, this training will give you all the relevant foundation and specialist skillsets to carve an exciting new career in cybersecurity.
- Cybersecurity Specialists - this program is relevant for specialists with 3-5 years and more. You will polish up your skills, learn the most current tools and techniques relevant for the newest systems, and boost your reputation
