

# Cybersecurity Master Annual Program 2025

Trainings-ID: CMAP25-LG

Zum Seminar →

## Das nehmen Sie mit

This is a perfect and complete learning path, designed as a continuous program that will keep the participants on top of the latest developments in this ever-changing industry. Every month, the students learn a new essential skill to become a cybersecurity Expert with the most up to date skills. This mastery program is great for people that are starting out in cybersecurity, or are a seasoned IT pro who wants to switch into cybersecurity.

This comprehensive program consists of 16 modules, and you can enroll in the entire course or select any individual modules that suit your needs – the decision is yours!

This course is a live, online certification program divided into 16 modules and spread over 12 months.

All workshops are interactive and demo-intensive and eventually equip you with essential cybersecurity skills for Windows systems. Everything based on the newest content to give you relevant industry knowledge.

## Zielgruppen

- Ambitious Beginners in Cybersecurity - If you are a beginner with 1-2 years experience in cybersecurity, challenges define who you are. This training will hone your skills to detect today's sophisticated cyberattacks and accelerate your career prospects in the field.
- Specialists in IT - If you have 4-5 years experience in IT and want to spin off into cybersecurity, this training will give you all the relevant foundation and specialist skillsets to carve an exciting new career in cybersecurity.
- Cybersecurity Specialists - This program is relevant for specialists with 3-5 years and more. You will polish up your skills, learn the most current tools and techniques relevant for the newest systems, and boost your reputation.
