

Modern Windows Security Baseline: Standards, Settings and Solutions for Managing Safe Environment

Trainings-ID: **CMAP26-Mod13**

Ort: **Online**

[Zum Seminar →](#)

Das nehmen Sie mit

During this module, students will learn how to apply modern security baselines to Windows 11 and Windows Server 2025, secure hybrid AD/Entra ID join scenarios, and implement effective controls for local administrative access.

The Expert will also demonstrate the newest auditing baselines and hardening techniques that help maintain a safe and well-monitored Windows environment.

Zielgruppen

This is an advanced workshop for Cybersecurity Specialists who would love to explore new dimensions of cybersecurity or ambitious geeks who would like to take on a challenge.

- Ambitious beginners in cybersecurity - If you are a beginner with 1-2 years experience in cybersecurity, challenges define who you are. This training will hone your skills to detect today's sophisticated cyberattacks and accelerate your career prospects in the field.
- Specialists in IT - If you have 4-5 years experience in IT and want to spin off into cybersecurity, this training will give you all the relevant foundation and specialist skillsets to carve an exciting new career in cybersecurity.
- Cybersecurity Specialists - This program is relevant for specialists with 3-5 years and more. You will polish up your skills, learn the most current tools and techniques relevant for the newest systems, and boost your reputation.
