IBM System z Parallel Sysplex Operations

Trainings-ID: ES73G

MOC: ES73G

MOC: ES73G

Zum Seminar →

Das nehmen Sie mit

This course is designed so that students can learn how z/OS systems operate in a Parallel Sysplex environment through discussion topics and hands-on lab exercises. Students learn problem determination skills, practice enhanced sysplex operations, including management of the coupling facility (CF), and use recovery capabilities provided by the System z servers. The course consists of six units and 12 hands-on lab exercises.

Training Paths that reference this course are:

z/OS and System z

z/OS Operation and Parallel Sysplex

Zielgruppen

The audience includes operations personnel and technical staff who are directly involved in the installation, operation, systems support, and software support of their Parallel Sysplex environment.
