

Cluster Administration using HPE SGI Management Suite

Trainings-ID: H6LM8S

[Zum Seminar →](#)

Das nehmen Sie mit

The HPE SGI Management Suite cluster administration course provides knowledge and practice in basic cluster administration areas such as cluster software installation ,cluster configuration, administration commands, software repository and image management, provisioning, application installation, monitoring with Ganglia and Nagios, and troubleshooting the cluster.

After you successfully complete this course, expect to be able to:

- Use the ipmitool command to setup for cluster admin node imaging
- Setup Serial Over Lan for console access and power control
- Troubleshoot startup problems
- Configure a cluster using the SGI Management Center 3 (SMC3)
- Image compute nodes
- Run InfiniBand commands
- Setup user accounts
- Run MPI applications across the cluster
- Monitor a running cluster with Ganglia and Nagios
- Add and remove compute nodes
- Install and setup a batch scheduler
- Submit batch jobs with a batch schedule
