---

## Das nehmen Sie mit

Using both real hardware and DCS, this class covers advanced HPE OneView features, including automation, firmware, and driver updates, SPP management, troubleshooting, and VMware® vSphere Lifecycle Management . A demonstration on HPE Compute Ops Management is also presented.

### Course objectives

After completing this class, you should be able to:

- Explain advanced HPE OneView features including firmware management
- Use HPE OneView for VMware vCenter Server for workload management
- Manage HPE OneView security and perform basic troubleshooting
- Use PowerShell Library for HPE OneView for automation

## Zielgruppen

This course is ideal for HPE Synergy administrators who want to extend their knowledge of more advanced HPE OneView features and integration points.
