

# HPE Storage: Containers and Automation

---

Trainings-ID: HN5A3S

[Zum Seminar →](#)

---

## Das nehmen Sie mit

This course provides hands-on learning for developers and administrators who create automation and integration applications. The course focuses on automating container applications using HPE storage arrays and:

- HPE modules for Ansible-enabled automated storage provisioning
- an SDK to communicate with the HPE storage array over the WSAPI REST interface
- the HPE Volume Plugin for Docker that provides persistent storage for your containerized applications and popular container platforms like Docker, Kubernetes, and OpenShift
- the tools and techniques to automate deployment of an application in Kubernetes with persistent storage

Upon completion of this course, students will be able to:

- Demonstrate the use of the WSAPI REST interface
- Configure and use a Docker environment using the Docker storage plugin
- Configure a Kubernetes environment that uses HPE Primera/3PAR storage

## Zielgruppen

- Developers and administrators who create automation and integration applications
