Das nehmen Sie mit

The HPE InfoSight Analytics Professional class provides an overview and hands-on lab exercises covering the AI-driven management and predictive analytics features and functionality of Infosight. In this course, you use HPE InfoSight to analyze performance issues and to gain recommendations for HPE 3PAR, HPE Primera, HPE Nimble, HPE servers, HPE SimpliVity and HPE virtualization infrastructure solutions. This course is updated to include new and advanced features of HPE InfoSight.

At the conclusion of this course, the student should be able to:

- Describe device registration requirements
- Navigate dashboards
- Analyze performance issues
- Analyze recommendation insights
- Forecast storage, server, and virtualization requirements

Zielgruppen

- The training targets HPE 3PAR StoreServ, HPE Primera, HPE Nimble, HPE server, HPE SympliVity, and HPE virtualization customers.
