## Das nehmen Sie mit

ITIL 4 enables your organisation to use best practices around service management while implementing the latest concepts in IT and also answering crucial questions, like:

- How do we create value for the customer and for the IT?
- What is the role of IT and IT services in a business strategy? Which role should it be?
- How can we support our organisation on their way to digital transformation?
- How do I link - if I want to - service management with new methods of working like Lean, Agile, DevOps, etc.

These and many other interesting questions are clarified and answered in our ITIL 4 courses, where you will find that our trainers put a major emphasis on enhancing the theoretical knowledge with examples of practical application. This should allow you as a user of the method to have a better understanding of ITIL.

The course includes the ITIL 4 Foundation exam, a certificate which not only proves your knowledge but becomes the basis for any future advanced trainings in that area.

What is your benefit of booking an ITIL training with us?

- Our lead trainer was and is actively involved in the development of ITIL 4.
- Our lead trainer is Austria's first ITIL 4 Managing Professional.
