

IBM InfoSphere Information Governance Catalog v11.5.0.2: Understanding Information Assets

Trainings-ID: KM625

[Zum Seminar →](#)

Das nehmen Sie mit

This course enables students to acquire the skills necessary to use the Information Governance Catalog to analyze metadata stored within the Information Server Repository. The emphasis is on how metadata gets captured within the repository and how to explore and analyze the metadata it contains.

Zielgruppen

This is a basic course for those who will be using IGC to explore and analyze metadata stored within the Information Server Repository.
