Das nehmen Sie mit

PRojects IN Controlled Environments is a project management method, that is being used in all kinds of projects, independent of size and industry. It was originally created by the British government and is the most used method worldwide with intensive use all over Europe, Middle East, but also the United States and Canada.

Projects are usually managed with varying success, sometimes a huge amount of effort, energy is invested and projects are delayed or above cost.

This training teaches you to be an expert in project management and how to run and finish your projects within the time and cost constraints give. You will learn how to do project and stage planning, how to do risk management and you will learn all aspects of quality control – topics that are often neglected.

With our PRINCE2 Practitioner training you will learn all aspects of PRINCE2 7th edition (including the 7 principles, 7 themes and the 7 processes) and how you can manage projects yourself with the help of PRINCE2.

Zielgruppen

- People that work for organisations that need to run projects effectively and efficiently, whereas PRINCE2 can be used equally well for IT and non-IT projects
- Project- and program managers that want to deepen their knowledge around project management or want to be certified
- People that have regular contact with project teams and want to understand the terminology and principles that are being used
- Information Workers
- Information Worker

Wichtige Informationen

The exam fee in the amount of EUR 515,- is included in the course price.

You will also receive 3 month access to myPrince2 - the best practice subscription for service management professionals. MyPrince2 provides practical help, easily accessible support and professional assistance you need to advance your Project career.
