## Das nehmen Sie mit

Enterprise data is growing exponentially. This data explosion is making commonly accepted practices of data management inadequate. Social, mobile, cloud, big data, and analytics are driving an explosion in data volumes and causing new challenges for data protection, disaster recovery, regulatory requirements, and standards for compliance. Data management has become one of the highest priorities of organizations today. The IBM FlashSystem products are designed to help companies improve performance and reduce server sprawl, power consumption, cooling, and floor space requirements. All of this in turn can help clients save money, improve performance, and invest more in innovation. The IBM FlashSystem family can help you take control of your storage, harness existing data, and manage your IT infrastructure in a much more cloud-like fashion. This course will aim to provide the basics of flash storage systems, specifically IBM's portfolio in this area.

Nach Abschluss dieses Seminars haben die Teilnehmer Wissen zu folgenden Themen:

- Demonstrate an understanding of flash storage from a technology standpoint
- Summarize the benefits of IBM FlashCore technology
- Recognize all the flash storage products from IBM and their benefits
- Summarize the architecture of IBM FlashSystem products, namely IBM FlashSystems 900, V9000, A9000 and A9000R
- Demonstrate an ability to access and interact with the graphical interface of IBM FlashSystem V9000
- Summarize the various use cases of each of the FlashSystem products

## Zielgruppen

- Customers
- Technical IBM personnel
- IBM Business Partner technical personnel
- IT consultants and architects
