

Threat Hunting Bootcamp for SOC Analyst

Trainings-ID: THBFSA

Zum Seminar →

Das nehmen Sie mit

Over the course of 3 days participants will learn some of the modern attack techniques, local privilege escalation methods, and identity infrastructure attacks as well as the ways how those attacks could be detected and mitigated.

This knowledge will be enhanced with case studies which will demonstrate how real-world attacks happen using the methods learned. Additionally, participants will be introduced to Microsoft Sentinel SIEM solution and will learn how to properly set-up, configure, and use this solution.

The course will conclude with showcasing how threat hunting and threat detection design can be performed by leveraging manual and automated methods.

This is an international course, which means you will share the learning experience in a group of IT pros from around the world! The class is taught in English by CQURE Cybersecurity Experts! During this course you will have an opportunity to interact with the instructor and get their help with any problems you might encounter, just as if it was a regular class.
