

C Programming on NonStop Systems

Trainings-ID: U4144S

Zum Seminar →

Das nehmen Sie mit

In this course, you will get a solid introduction to the HPE NonStop™ Server implementation of ANSI-standard C programming. You will learn C language syntax and ANSIstandard I/O routines and apply your knowledge through lab exercises. From basic syntax to advanced techniques, the course provides an intensive look at the C language. Prior C knowledge is essential.

After you successfully complete this course, expect to be able to:

- Provide an intensive look at basic C language syntax and advanced ANSI-standard I/O routines

Zielgruppen

- System analysts
- System programmers
- Programmers
- Programmer analysts
