NonStop SQL/MP Query Design for Performance

Trainings-ID: U4183S

Zum Seminar →

Das nehmen Sie mit

Enhance your query writing skills by learning how to design complex and efficient queries to access HPE NonStop™ SQL/MP databases in this 4-day class. Learn the different query analysis and tuning techniques. Become familiar with tools to optimize query performance, influence the optimizer's choice of query execution plans, and test queries before they go into production. This course is applicable for both online transaction processing (OLTP) and decision support solutions (DSS) query programmers.

Zielgruppen

Anyone who has responsibilities for query design and programming or query performance and tuning.
