

Implementing HP MSA 2000 Storage Solutions

Trainings-ID: U4226S

[Zum Seminar →](#)

Das nehmen Sie mit

This course introduces the Modular Smart Array (MSA) solutions 2312fc, 2324, and P2000 and focuses on implementing and managing an MSA SAN solution. Gain an understanding of the features, benefits, and components of each of the systems. Learn the main considerations for installing, configuring, and troubleshooting the systems and how to use the various tools and utilities available for configuring and managing the array systems. The course is 60 percent lecture and 40 percent hands-on labs using HP servers.

After you successfully complete this course, expect to be able to:

- Explain the benefits of a Storage Area Network (SAN)
- Explain the product benefits and main features of MSA products
- Identify, locate, and discuss functions of the hardware components including: controllers, drive enclosures and hard drives, fibre channel and iSCSI controller modules, expansion controller modules, power and cooling units, and related interconnect devices
- Identify the software applications supported on MSA products
- Navigate and utilize the Storage Management Utility (SMU)
- Discuss the sample configurations for MSA products
- Discuss and utilize command line interface commands
- Discuss basic operating procedures and associated considerations
- Discuss local and remote configuration
- Discuss how to perform troubleshooting
- Describe best practices
